Subject: 2016 Ohio Public Works Commission (OPWC) Street Resurfacing Program.

Dear Resident:

The Village has received funding through the subject grant and loan program for the resurfacing of Tower St, and part of Washington St. The resurfacing will include Tower Street from Market St. to Washington St., and Washington St. from Tower St. to Water St. There will be a period of time during normal working hours when you will not be able to access, or use your driveway. We will try to keep this incontinence to a minimum.
If you have a special needs requirement for access please contact us so we can make appropriate arrangements?
Work is scheduled to begin the week of 08/01/2016.

Thank you for your cooperation during this project.

You can also visit the Village Web Site (Engineering Department) for up to dated schedules, and project progress reports.
